# YANTING WANG

Ph.D. Candidate | Management Information Systems | Sungkyunkwan University Business School
Email: wyanting@skku.edu | ORCID: https://orcid.org/0009-0001-1929-8439
Homepage: https://w-yanting-skku.github.io/ | Google Scholar: Link
Location: #33507 Business School Hall, 25-2, Sungkyunkwan-ro, Jongno-gu, Seoul, South Korea

## RESEARCH INTERESTS

- Human–AI and Human–Robot Interaction
- Physical AI in Organizational Settings
- AI Explainability, Trust, and Failure Recovery
- Technology-Mediated Collaboration

## EDUCATION

**Ph.D. Candidate in Management Information Systems** September 2022 – Present
*Expected Graduation: March 2027*
Sungkyunkwan University, South Korea
Advisor: Sangseok You

**M.S. in Management Information Systems** March 2020 – March 2022
Sungkyunkwan University, South Korea
Thesis: "Enhancing Robot Explainability through Social Cues with a Moderation Effect of Robot Design."

**Bachelor's Degree in International Business and Trade** September 2014 – June 2019
Kangwon National University, South Korea

## PUBLICATIONS

1. **Yanting Wang** and Sangseok You. "Enhancing Robot Explainability in Human-robot Collaboration." In *International Conference on Human-Computer Interaction*, pp. 236-247. Cham: Springer Nature Switzerland, 2023.
2. **Yanting Wang** and Sangseok You. "Designing Embodied Robots for Real-World Applications: A Contextual and Goal-Driven Framework Grounded in IS Design Science." *Korea Society of Management Information Systems (KMIS) Conference* (2025): 400-405.

## PAPERS UNDER REVIEW

1. **Yanting Wang et al.** "Examining Distinct Trust Pathways toward Human and Robotic Teammates in Hybrid Teams." Under review.
2. **Yanting Wang et al.** "Online News Appraisal Under Stress: How Internal and External Resources Shape News Believability and Behavior." Under review.

## JOB MARKET PAPER

**Trust Repair in Human-Robot Interaction After Service Failure**

- **Research Method:** Lab Experiment and Online Experiment
- **Introduction:** This project examines how service robots can restore user trust following service failures.

- **Contribution:** This study extends trust repair research in IS by theorizing how users rebuild trust in embodied IS artifacts following service failures.
- **Target Journal:** MIS Quarterly
- **Status:** Manuscript under development

## WORKING PAPERS

1. **Robot Multi-Party Awareness in Complex Frontline Service Environments: Effects on Service Adaptability and Customer Revisit Intentions**
   - **Research Method:** Lab Experiment, Focus Group Interview, and Online open-ended Questions
   - **Introduction:** This project examines how embodied AI systems coordinate interactions with multiple users in complex frontline service environments.
   - **Contribution:** This study extends IS research on embodied AI by conceptualizing multi-party awareness as a critical system capability and explaining how it enhances service adaptability and downstream user responses in complex service environments.
   - **Target Journal:** Information Technology & People
   - **Status:** Manuscript under development
2. **Communication Cues and Perceived Robot Explainability in Human-robot Collaboration**
   - **Research Method:** Lab Experiment and Online Experiment
   - **Introduction:** This project examines multi-party human–robot interaction and its effects on frontline service experiences.
   - **Contribution:** This study extends IS research on explainable AI by showing how communication cues embedded in embodied AI artifacts shape users' perceived explainability and subsequent evaluations during human–AI collaboration.
   - **Target Journal:** MIS Quarterly
   - **Status:** Online experiment finished and Lab Experiment in progress
3. **Comparing VR and MR for Spatial Learning**
   - **Research Method:** Lab Experiment
   - **Introduction:** This project examines how immersive technologies shape users' spatial learning through distinct technological affordances.
   - **Contribution:** This study contributes to research on immersive technologies by explaining how distinct technological affordances of VR and MR shape user cognition, learning processes, and learning outcomes.
   - **Target Journal:** Information Systems Frontiers
   - **Status:** Manuscript under development
4. **Cross-Cultural Perceptions and Acceptance of Humanoid Robots**
   - **Research Method:** Secondary Data Analysis (Sentiment Analysis and Topic Modeling)
   - **Introduction:** This project examines cross-cultural differences in how users perceive and evaluate humanoid robots through online comments.
   - **Contribution:** This study contributes to AI adoption research by showing how cultural and societal contexts shape users' interpretations, expectations, and acceptance of embodied AI technologies.
   - **Target Journal:** Behaviour & Information Technology

- **Status:** Data analysis in progress

## INDUSTRY COLLABORATION EXPERIENCE

1. **Hyundai Motor Company Robotics Lab (South Korea) 2022–2023**

   *Project Researcher*

   - **Project Title:** Developing and Validating Human–Robot–System Interaction Scenarios in Multi-Robot Service Environments
   - **Role:** Scenario development, qualitative data collection, experimental design and conduct, data analysis, and report development.

2. **Samsung Electronics (South Korea) 2024**

   *Project Researcher*

   - **Project Title:** Multimodal Interaction Design for Screen-Based Smart Devices
   - **Role:** Conducted literature review and contributed to experimental design.

## AWARDS & FUNDING

1. Brain Korea 21 FOUR Research Scholarship, Sungkyunkwan University, 2021, 2023–Present (approx. US$16,100)
2. International and Overseas Korean Student Scholarship, Sungkyunkwan University, 2020–2023 (approx. US$6,720)
3. International Student Scholarship, Sungkyunkwan University, 2024 (approx. US$2,350)
4. University Innovation Graduate Student Award and Living Stipend, Sungkyunkwan University, 2022–2024 (approx. US$3,910)
5. Graduate Assistant Tuition Waiver, Sungkyunkwan University Graduate School, 2024 (approx. US$1,400)

## TEACHING EXPERIENCE

1. **Teaching Assistant – Undergraduate Course**
   - IT Management
     *Delivered guest lectures, provided guidance on key course concepts, and assisted with assignment grading.*
   - Internet and Management
     *Delivered guest lectures, facilitated student Q&A, and supported assignment evaluation and course-related inquiries.*
2. **Teaching Assistant – Graduate Course**
   - Deep Learning and Decision-Making in Management
     *Delivered guest lectures on foundational machine learning concepts and supported in-class Q&A and student learning.*

## SEMINAR&TALK

- **Invited Talk:** “Humanoid–Robot Collaboration.”
  Sogang University–Sungkyunkwan University Joint Seminar, 2023.

- **Invited Talk:** "Service Robots in Human–Robot Interaction."
  Sogang University–Sungkyunkwan University Joint Seminar, 2024.
- **Invited Talk:** "Frontline Social Robots in Service Environments."
  Social Robot Seminar, Hong Kong Baptist University, 2025.

## SKILLS

- **Technical Skills:** SPSS, Python, R
- **Language Skills:** English (Fluent), Korean (Fluent), Mandarin Chinese (Native)

## ACADEMIC SERVICE

1. **Reviewer Experience:**
   - International Journal of Human-Computer Studies
   - Frontiers in Robotics and AI
   - ACM/IEEE International Conference on Human-Robot Interaction (HRI)
   - International Conference on Information Systems (ICIS)
   - Hawaii International Conference on System Sciences (HICSS)
   - European Conference on Information Systems (ECIS)
2. **Conference Volunteer:**
   - 25th International Conference on Human-Computer Interaction (HCI International 2023)
   - 21st ACM/IEEE International Conference on Human-Robot Interaction (HRI 2026)
